THE PHOENIX COMIC CLUB

HOW TO DRAW LEG MUSCLES

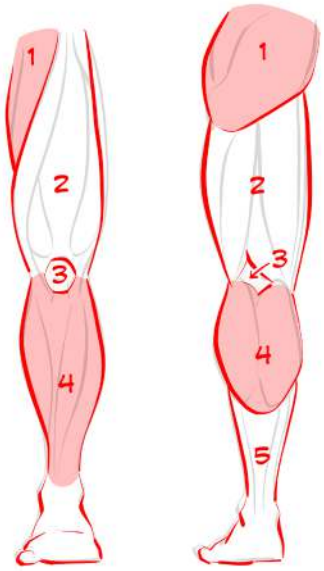

ACCURATE ANATOMY

THE LEG IS A ***COMPLICATED*** PART OF THE BODY AS IT'S MADE UP OF SO MANY MUSCLES AND TENDONS.

WE DON'T NEED TO KNOW THE NAMES OF ALL OF THESE MUSCLES BUT IT IS IMPORTANT TO BE ABLE TO ***VISUALISE THE BASIC GROUPINGS*** AND HOW THEY SLOT TOGETHER SO THAT WE CAN BEGIN TO ***SIMPLIFY*** THEM.

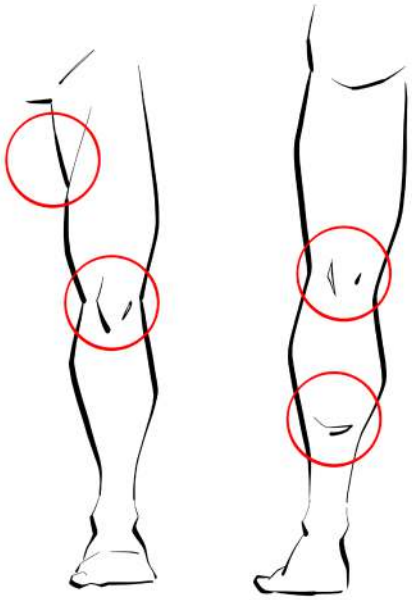

SIMPLIFIED ANATOMY

THE BEST WAY TO ***SIMPLIFY THE ANATOMY*** IS TO ***GROUP INDIVIDUAL MUSCLES TOGETHER.***

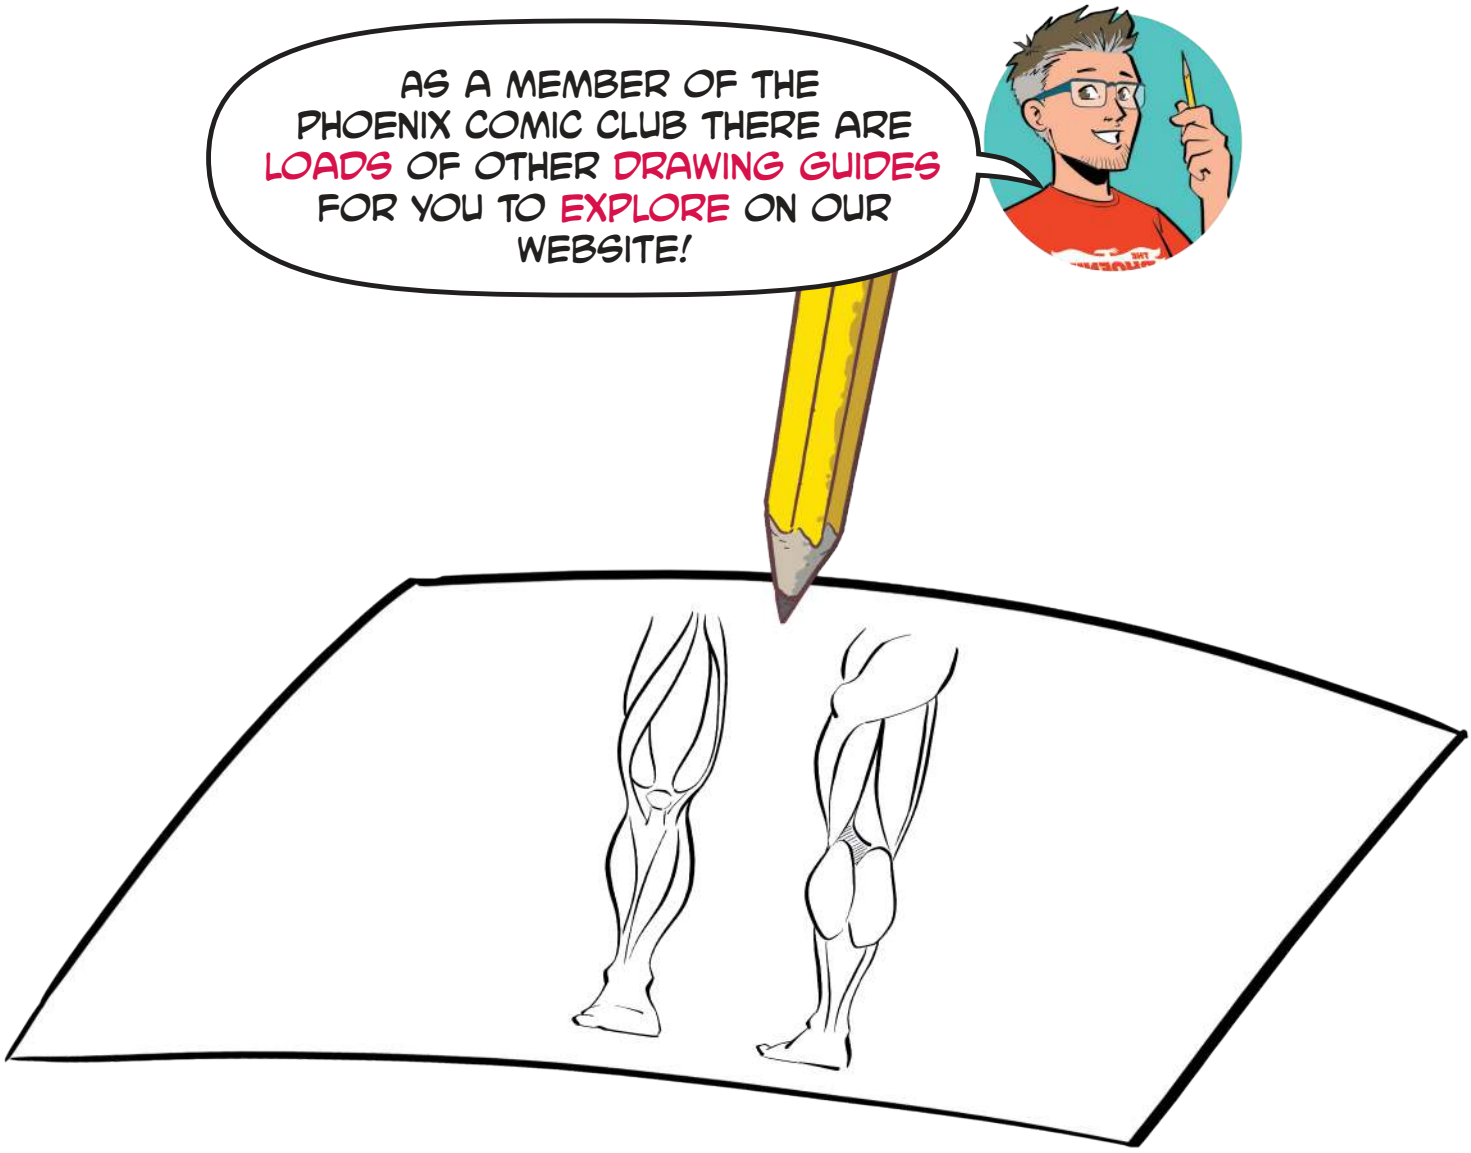

THE FRONT OF THE LEG CAN BE BROKEN DOWN INTO ***4*** DISTINCT GROUPINGS, WHEREAS THE BACK OF THE LEG IS MADE UP OF ***5*** GROUPS.

FINAL DRAWING

YOU CAN ***SIMPLIFY*** THINGS EVEN FURTHER IN YOUR FINAL ART BY JUST PICKING OUT ***SMALL BITS OF DETAIL*** FROM YOUR SIMPLIFIED ANATOMY.

YOUR FINAL LINEWORK CAN BE AS SIMPLE AS THE ***BASIC OUTLINE*** OF THE LEG BUT WITH A FEW ***SIMPLE LINES OF DETAIL.*** THE KEY IS KNOWING ***WHERE*** TO PUT THIS DETAIL AND THAT'S WHERE AN UNDERSTANDING OF ANATOMY BECOMES ***INVALUABLE.***
